How To Draw an 'A'ama Crab

Though it is basically black, you can have many colors within it. Here's an easy three step drawing of the black rock crab called 'a'ama in Hawaiian.

Step 1: FORMING –

Lightly draw a circle for the body with legs in three pieces. Make two long ovals and a pointed end that looks like a paint brush tip.

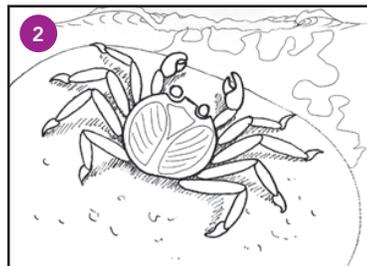

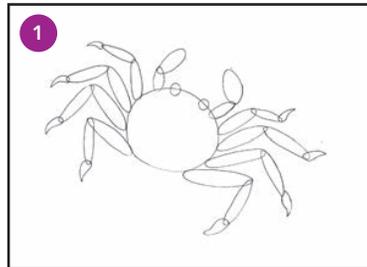

Put the eyes right over the shell line and make ovals where the pincers go.

Step 2: OUTLINING –

Go over the light drawing with darker lines. Notice how the pincers are done. Add the designs on crab's back, a rock, some splash lines and waves.

Step 3: SHADING –

Color your crab with black and any colors you like. They have many colors in them. Color the rock and ocean too. The splash can be kind of white.
